

Testimonial on Migraine Headaches

I used to get migraine headaches 2-3 times a week. I had seen my family doctors, who performed various tests...they were all negative. I was prescribed pain pills, they did help in relieving the pain but the migraine would come back within a day or two. I had a friend of mine suggest seeing a chiropractor. I had never seen a chiropractor, and I just didn't know what my back had to do with my migraines. When I saw Dr. Gerou, he thoroughly examined me, asked a lot of questions about my past health, activities, stress and what other treatment or examinations I had. Dr. Gerou began treating me and the first thing I noticed was that the tension in my neck, which I had felt for years, began to go away. As Dr. Gerou continued working with me, the first month passed...and no migraine! Another month passed, and again, no migraine! Dr. Gerou, continued to see me, only occasionally, for a few follow-up visits. I have now gone over ten months and no migraines! I would recommend anyone who has migraine headaches, or any headaches, to visit with Dr. Gerou and let him see what he could do for you!
